Name of Research Project	Impact of love.fútbol projects on the communities
Project Description	The current contingency scenario affects sport organizations no matter the organic and structural complexity. In this sense, increasingly, the role of SO's a community development perspective is evident. Thus, realizing the impact of sports projects in the community context tends to assist in more effective management. In addition, to measure the impact to the community, can be seen if the project objectives are achieved and the community's expectations are met.
Project Aims (150 words)	<ol style="list-style-type: none"> 1. To develop a set of indicators about the love.fútbol projects from the perspective of interaction with the community; 2. To establish an analysis model that allows identifying the community's perception of love.fútbol's projects; 3. To analyze the community's perception of the love.fútbol value for community development; 4. To create a compendium of best practices that allow the development of love.fútbol projects that meet the expectations of the community and consequent sustainability.
